ZIYA ANJUM

B.E. Artificial Intelligence & Machine Learning | Anjuman Institute of Technology and Management, Bhatkal
ziyanjum001@gmail.com | +91 83103 14048 | Shiroor, India | github.com/ZiyaAnjum | linkedin.com/in/ziya-anjum

SUMMARY

AI/ML undergraduate who builds and ships full-stack and AI-powered products. Hackathon winner seeking a software engineering or applied AI internship.

EDUCATION

B.E., Artificial Intelligence & Machine Learning — Expected 2028

Anjuman Institute of Technology and Management, Bhatkal | CGPA: 9.78/10.0

EXPERIENCE

MERN Stack Intern — Emertxe — Aug 12 – Sep 16, 2026

- Built **HomelyHub**, a full-stack property booking platform, using MongoDB, Express.js, React and Node.js.

Backend Developer — Noob Hackverse (College Hackathon Website) — Ongoing

- Building the admin backend (APIs, security, audit logging, notifications, deployment) for the college's hackathon event site, using Next.js Route Handlers and Supabase.

PROJECTS

Campus2Career | Winner, HackSpectra Hackathon (YIT) — GitHub | Demo

- Won the final among 23 shortlisted teams (235 registered). Web app that turns a student's resume into a personalised skill roadmap (React, Node.js, Express, Supabase).
- Built the AI engine (skill extraction, role matching, roadmap, mock interviews) and now lead its further development.

Stashly | AI Warranty & Receipt Tracker (DoraHack 2.0) — Live

- AI assistant that extracts warranty and return details from receipts, tracks expiry and guides claims.
- Ranked Top 50 on DoraHack and Top 73 on Product Hunt.

DormFix | Hostel Complaint Tracking Platform — Live

- Full-stack app (React, Node.js, MongoDB) with photo uploads, 48-hour auto-escalation and an admin dashboard; deployed on Vercel and Render.
- Secured with JWT and bcrypt auth, rate limiting and duplicate-complaint detection.

Digital Legacy & Password Vault | Team Lead — DBMS Project

- Led a team building an encrypted credential vault (Node.js, MySQL, JWT, AES-256-GCM) with a nominee-access flow and inactivity detection.

ThreatLensAI | Smart India Hackathon 2026 — PS26106

- Email threat detection platform identifying phishing, domain spoofing and social engineering, tracing an email's origin and delivery path via ML classifiers, threat-intel feeds and Gemini.
- Built the Scam Check API, Local Scan History and a Supabase-backed Community Scam Reports module.

TECHNICAL SKILLS

- **Languages:** Python, Java, C, C++, JavaScript
- **AI/ML:** Machine Learning, Supervised Learning, Exploratory Data Analysis
- **Web:** React, Node.js, Express.js, REST APIs, Tailwind CSS
- **Databases & Security:** MongoDB, MySQL, Supabase, JWT, bcrypt, AES-256-GCM
- **Tools:** Git/GitHub, Vercel, Render, VS Code, Cursor

CERTIFICATIONS & AWARDS

- Winner, Bootcamp Project: built a Smart Cane, a hardware and software project
- IBM Machine Learning Professional Certificate: Exploratory Data Analysis for ML, Supervised Machine Learning (Coursera)
- Google AI Essentials (Coursera) | AWS AI Practitioner | Anthropic Claude 101 and Claude Cowork
- DSA for DeepTech Bootcamp, Brainovision Solutions / AICTE (May 2026) | SHE CODES TOO Scholarship recipient
- Rabita Award — highest marks in 12th, Anjuman Pre-University College for Women, Bhatkal | Student of the Year
